PROFESSIONAL SUMMARY

Full Stack Developer & Senior WordPress Developer with 3+ years delivering production-grade websites for global clients (Unbounce, Insightly, Traction Complete, Intiveo, PPIC). Expert in custom theme/plugin development, Gutenberg blocks, and ACF architectures across WordPress, Drupal, and Craft CMS. Extends into React/Next.js frontends, Flutter mobile apps, and AI/LLM integration. Proven impact: +15% organic traffic, -30% LCP, fixed sitemap bugs on 1,700+ indexed URLs, and scaled integration UI from 16 → 57+ items with zero regressions. CI/CD-disciplined with multi-platform hosting expertise (Pantheon, WP Engine, Kinsta, Servd).

PROFESSIONAL EXPERIENCE

Web Developer → WordPress Developer | *Fuelnt Technologies, Tamil Nadu* | DEC 2022 - May 2026 | Full-time

- Developed custom WordPress themes and plugins from Figma across 20+ client sites in Agile/Scrum teams; reusable Gutenberg blocks and ACF components reduced repeat-project build time by ~25%.
- Implemented JSON-LD structured data (FAQ, Product, Breadcrumb, Organisation) across multiple sites, improving Rich Results eligibility and CTRs; resolved redirect chains and canonical issues, lifting organic traffic ~15% on average.
- Optimised Core Web Vitals via caching, asset optimisation, and code refactoring – cut LCP by ~30%, improved CLS by 0.05, and fixed a URL-encoding bug in sitemap generation that affected 1,700+ indexed URLs, restoring full crawlability in Google Search Console within one sprint.
- Managed Git workflows, multi-SSH key configs, and staging-to-production deployments across Pantheon, WP Engine, Kinsta, and Servd; applied security patches to WordPress, Drupal, and Craft CMS every release cycle.

- Refactored legacy PHP to WordPress coding standards; diagnosed production issues (JS conflicts, plugin incompatibilities, ACF/Gutenberg interactions) under tight deadlines.
